

Projects

- No more assignments!!
- Now: 5-6 week project phase
- Deliverables:
 - Report
 - Code to reproduce your results
 - Presentation
- No 1-on-1 supervision by TAs
 - But we are always there if you need help or guidance :)
- Schedule
 - 6 weeks (**deadline and presentations: Fr. July 31st**)
- No more in-person tutorials.

Juli						
Mo	Di	Mi	Do	Fr	Sa	So
		1	2	3	4	5
6	7	8	9	10	11	12
13	14	15	16	17	18	19
20	21	22	23	24	25	26
27	28	29	30	31		

How to find a topic

- We will share a list with project ideas from which you can freely choose a topic
- Proposals = “minimal” project ideas
- We encourage to go beyond and your own ideas that arise while working on the projects

Projects can be for example

- Combinations of multiple methods to solve a new problem
 - Improvements of existing works
 - Comparisons of different methods
 - ...
-
- You can also come up with your own project ideas altogether
 - **BUT** please send us a proposal so we can tell you if it aligns with our expectations

Deliverables

Report

- Motivate the project
- Explain what you did
- Qualitative and quantitative results
- Key insights, failure cases, potential future work?

Presentation

- Present results of your project
- 10min per group + 5min questions
- We will announce date and time

Code

- We will not grade you for your code quality
- To understand what you were doing and what was already there

Each report will be graded by 2 TAs

Presentation is also graded!
